

A Success Story

A large international aluminum company has been using the training supplied by **The Back Saver System** since 2007. Brought back for repeated training, year after year, by direct vote of the employees, due to employees naming **The Back Saver System** "...the most worthwhile training we have ever received".

The company has grown enormously in the last several years, nearly doubling the number of employees at one plant from 300 to nearly 600 employees. Even during this period of growth, with the help of the **The Back Saver System** training, the company has been able to achieve over 2 million employee work hours without a lost time incident and reports no back injury claims.

Several employees have expressed their gratitude, reporting that they previously had experienced back pain for years and were referred for surgery. After being exposed to the unique techniques of **The Back Saver System**, their back pain has been resolved without any surgical intervention and due to their own efforts. That's *employee empowerment*...which is the heart and soul of **The Back Saver System** !

The Back Saver System

A natural integrated health and safety training program that dramatically reduces back injuries, fatigue/diabetes, heart disease/hypertension/cholesterol and provides simple, lasting weight reduction.
